

## Why Diamon-Fusion?

Homeowners, designers, architects and developers around the world are requesting Diamon-Fusion low-maintenance coating on their glass and glass-like surfaces. The patented, easy-to-clean formula has been applied to millions of shower doors worldwide and used on prestigious landmarks and commercial buildings globally.

Diamon-Fusion is also backed by an unprecedented limited lifetime warranty, guaranteeing the coating will perform for the lifetime of the glass as long as basic care instructions are followed.

For more information about the warranty, please go to [www.dfisolutions.com/warranty](http://www.dfisolutions.com/warranty).

Revitalizer™ is not required to maintain the Diamon-Fusion warranty, as long as basic care instructions are followed.

## DFI's Approved List of Cleaners:

- ◆ Sprayway®
- ◆ Simple Green®
- ◆ Ammonia Free Windex®
- ◆ White household vinegar diluted with water
- ◆ Seventh Generation™ Natural Glass & Surface Cleaner

"I read how Diamon-Fusion keeps glass from spotting and had to give it a shot. Fast forward two years and the glass is just as beautiful as the first day it was installed. There is hardly any maintenance. I would recommend it to anyone."

– *Lalakini* from Santa Cruz, CA

"Diamon-Fusion was applied to our new shower enclosure and the maintenance is a piece of cake. There is no evidence of any soap scum or water marks. I couldn't be more pleased with the results."

– *Joel* from Armonk, NY

# Easy-to-Clean Shower Glass Protection

Diamon-Fusion® keeps your glass  
looking beautiful for longer

## Proven Glass Protection

Diamon-Fusion® is a patented, protective coating that repels water, soap scum and other contaminants from your shower doors and other glass, making it easier to clean. Just as a non-stick cooking pan significantly reduces the time and effort needed to clean, so too will Diamon-Fusion significantly cut the frequency and time needed to clean your glass.

Its invisible barrier prevents water and contaminants from sticking to the glass, leaving you with a beautiful, longer lasting shower door.

-  **Superior protection**  
Diamon-Fusion coated glass protects against hard water stains, soap scum, mineral leaching and much more.
-  **More free time, less cleaning**  
Reduce cleaning time by up to 90% with minimal care.
-  **No more harsh cleaners**  
Eliminate the need for abrasive chemical products, creating a better environment.

## Protection Guaranteed

Diamon-Fusion chemically bonds to the glass transforming it into a high performance, hydrophobic surface that protects against corrosion, staining and etching. Once the Diamon-Fusion coating comes into contact with the silica in the glass, an invisible, ultra-thin protective layer is formed, creating a permanent bond.

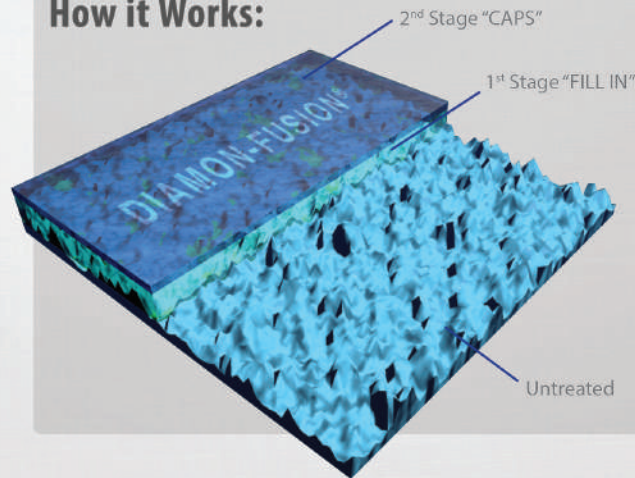

Once applied to the surface, Diamon-Fusion will also guard against environmental pollutants, leaching from minerals, and weathering.

## Patented Technology

Glass is a naturally porous surface that allows hard water and mineral contaminants to easily penetrate the surface and cause unwanted staining and corrosion. Diamon-Fusion seals the surface of the glass for longer-lasting beauty, with far less maintenance.

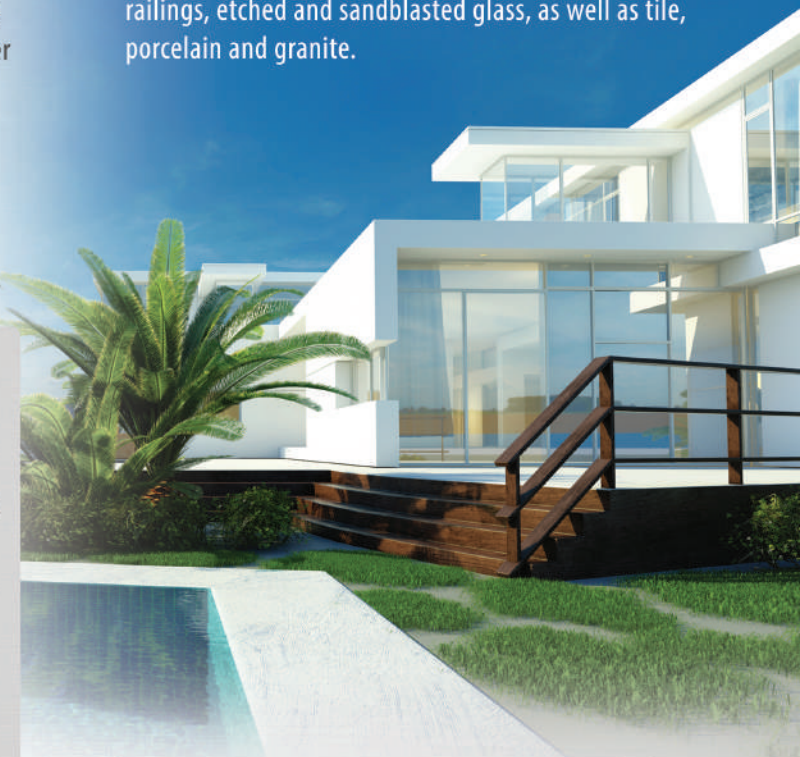

Its patented, two-step technology creates a covalent bond by filling in the microscopic ridges and is then "capped" and sealed to enhance the smoothness of the surface.

## How it Works:

## Multiple Surfaces – One Solution

Diamon-Fusion helps maintain and protect glass and glass-like surfaces. Applications include, but are not limited to, shower doors, windows, solar panels, glass railings, etched and sandblasted glass, as well as tile, porcelain and granite.

## Longer-Lasting Beauty

- ◆ **Reduce overall cleaning** – ultra-thin barrier cuts cleaning time and frequency of cleaning.
- ◆ **Hydrophobic and oleophobic** – protection against limescale, soap scum, oils and mineral contaminants.
- ◆ **Improved brilliance and clarity** – optical clarity guaranteed for the lifetime of the glass.
- ◆ **UV resistant** – won't break down in sunlight.
